

Enhanced High Achiever's Dip CII Programme

2019–2020

About Dip CII

The Diploma in Insurance of the Chartered Insurance Institute is a technical and supervisory qualification for insurance staff working across all sectors of the industry (and the logical progression from the Certificate in Insurance).

It will provide high achievers with a firm grounding in insurance fundamentals and will enable them to build towards advanced technical knowledge, thereby ensuring they have the means to function effectively in a challenging environment.

To complete the Diploma in Insurance candidates must obtain a minimum of **120 CII credits** with at least 90 credits at Diploma level or above.

Changes in the Programme

RISC Institute provides a programme for candidates to complete the Diploma in Insurance in **eighteen months** through part time study: In-class or Live Virtual Classes. This includes in-class training spread over the months plus e-learning support by the tutor consisting of self-paced lessons, question forums, practice quiz, further reading resources and sample assignments.

Candidates are prepared to sit for the:

CORE COMPULSORY UNITS	OTHER UNITS
<ul style="list-style-type: none">• M05 – Insurance Law (25 credits)• M92—Insurance Business and Finance (25 credits)	<ul style="list-style-type: none">• M93 – Commercial Property and Business Interruption Insurances (25 credits)• M96 – Liability Insurances (25 credits)

These mixed assessment units include one coursework component which must be submitted online. The second component consists of a 50 multiple-choice question (MCQ) online exam. Candidates may register within the cycle, on the start of a course.

REGISTRATION TO CII MIXED ASSESSMENT

In order to assist candidates to meet deadlines and pursue their studies in a more structured method, RISC Institute will be taking group registration for the CII mixed Assessment at the start of the in-class course for each subject. The classes will be held on alternate Saturdays for 6 hours (09.00 hrs. to 16.00 hrs. including breaks) and are expected to spread over three months. The boot-camp will be held after the last class and the MCQ exam will take place about a week later.

Once you have registered with CII you will receive the text book and assignment at the start of the in-class course for each subject and you can start working on your coursework assignment. You may bring up matters arising therefrom for discussion in class creating a more interactive discussion forum. As at present, such discussions can also be raised on the online forum. We draw your attention to the CII's instructions and guideline for coursework assignments especially the part about collaboration. While you may raise relevant matters for discussion, you must not disclose your assignment to the tutor or other colleagues on the course.

Once the course and MCQ exam is completed, we shall allow three weeks before starting the next subject to enable you to finalize and submit your coursework assignment to the CII before starting a new subject.

COURSE CONTENT

As at present, each course shall still consist of around thirty six to forty eight hours of face-to-face classroom time which is simultaneously transmitted online through our Virtual Live Class. We shall be making more use of the e-learning support.

Since there will be two weeks in between each class, we shall be assigning short answer questions on each learning objective that candidates should complete before coming to the next class. Your answers will be moderated by the tutor. This helps you to remain focused. The tutor will also be asking questions via the forum so that candidates can participate in an online discussion in between classes.

OBJECTIVES

The changes in the programme will help to achieve the following objectives:

- ⇒ The course for each subject is more structured with timetables and deadlines thus inducing completion as planned.
- ⇒ One day sessions allow us to maximize use of class time and be more focused than meeting twice for three hours, also saving on travel time.
- ⇒ Scheduling classes on alternate Saturdays means we can have an alternative Saturday off for family or study time.
- ⇒ The participants from Abu Dhabi and Northern Emirates do not have to travel back and forth for three hours to attend a three hour session every week. They only have to do the travelling twice a month.
- ⇒ We can finish each course within three to four months.
- ⇒ It will take a little longer than a year to finish all four subjects but the schedule will be more focused on completing the modules with the exams and the assignments, rather than just completing the classes

SCHEDULE

Code	Title	No. of Sessions	Dates
M96	Liability Insurances	10	Next cycle 2020
